 **NEIWPCC** is pleased to announce the release of *Clarifier - Tools for Wastewater Operators*. *Clarifier* was developed by NEIWPCC under a grant from the U.S. Environmental Protection Agency (EPA). It is the second generation of the program *POTW\_PAS*, which was also developed under a grant from EPA.

*Clarifier* was developed to function as a stand-alone software package for Publicly-Owned Treatment Works (POTWs). The package provides tools for performing compliance self-audits and source reduction analyses and also includes tools to assist with the daily operations and maintenance of wastewater treatment facilities. The primary target audience for *Clarifier* is wastewater operations personnel, including operators, management personnel, superintendents, and maintenance personnel.

The new features and functionalities built into *Clarifier* include:

- Use of data to manage and troubleshoot treatment facilities.
- Process control for the most prevalent treatment technologies (suspended growth, attached growth and ponds).
- Capability for computer generation of trend charts and graphs based on POTW operating performance characteristics.
- Basic facility and equipment maintenance tracking.
- Financial management - comparison of budgeted amounts with actual expenditures.
- 503 Biosolids compliance information and reporting.
- Math Models to project potential reaction of the facility and unit processes to various operational adjustments.
- Graphic capability to develop individual plant schematics for unit processes and treatment.

Base system requirements are:

- Windows 95, 98, ME, NT 4.0 or higher
- 15 MB free disk space
- 32 MB RAM

*Clarifier* is available from NEIWPCC for the shipping and handling costs of \$25.00 (ordering information below). If you have any questions, please contact NEIWPCC at [clarifier@neiwpc.org](mailto:clarifier@neiwpc.org) or check the NEIWPCC "What's New" web page ([www.neiwpc.org](http://www.neiwpc.org)) for more information.
