This document, commonly known as TR-16 (short for Technical Report #16), has long been one of NEIWPCC’s most requested publications, and we are excited to announce the publication of the new 2011 edition. Like its predecessors, the new TR-16 covers in detail the important elements of wastewater treatment that must be considered in the design of wastewater treatment works. The content, however, has been completely updated to reflect current practices and to include advances in technology, nutrient removal, energy efficiency, and instrumentation. The intended audience includes engineers who design wastewater treatment plants, state regulators who review and approve designs, and municipalities that are soliciting professional design services for wastewater treatment facilities. The new version is available in hard copy manual or CD.

Price: $95.00 per copy (hardcopy) or $25.00 (CD)
Includes shipping & handling (US Media Mail)

To order, indicate hard copy and/or CD below and quantity desired. Return this form with required payment to the address below. Please allow 2-3 weeks for delivery.
